

LUMBER WORLD

'A Destination for your Imagination'

BIRCH PLYWOOD

Pale whispers from the north, where birch trees dance in sun-dappled groves. Birch plywood, a canvas kissed by winter's chill, its grain a symphony of strength and silken grace. No rough-hewn workhorse, this, but a ballerina of the building world, her layers pirouetting in perfect unison.

Phenol-formaldehyde, the unseen choreographer, binds them in an unyielding embrace. Birch plywood, a whispered promise of elegance and resilience, ready to pirouette your vision to life.

BIRCH PLYWOOD

SPECIFICATIONS

Size	Layers	Face Materials	Face
1220*2440*6.5mm	5layers	Birch	Aaa
1220*2440*9mm	7layers
